

UltraFire

AFFF Foam Fire Extinguisher

Why foam? More versatile than water, foam extinguishers can be used on both Class A (wood, paper or textiles) and Class B (flammable liquids, e.g. petrol or oil) fires. The blanketing effect of foam spray gives a rapid knock down which smothers the flames and prevents re-ignition.

Where should foam be used?

Foam has a wide range of uses including warehouses, offices, residential properties, shops, schools and hotels which often have a large amount of wood, paper or textiles. In case of accidental use on electrical fires the dielectric mist spray nozzle protects the user.

Why UltraFire? Enjoy personal service, quality products and competitive trade pricing when you purchase from UltraFire. With many years of experience supplying a wide range of fire safety products to trade customers worldwide, UltraFire can offer you a reliable service and a range of delivery options to suit.
