

UltraFire - Fully Customisable Construction Site Stands

Every construction site is different and so are our customised construction safety stands. Each stand can be made to your own specification ready with a unique site plan and your specific set of instructions.

We offer four safety stand ranges including fire points, first aid stations, health & safety / PPE stands and spill control stations. All our stands are colour co-ordinated so that your staff know exactly where to go in the case of an emergency situation. We have put together a range of accessories that can be fitted to provide you the solutions you need on site.

Select fire extinguishers, defibrillators, first aid kits and cabinets to create the perfect stand for you. All of our products have been chosen for the rugged conditions that an outside station will be subjected to and conform to industry standards.

Dedicated Support Team

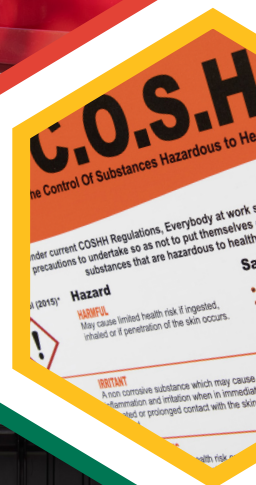

If you are unsure of what you require for your safety stand, our knowledgeable sales team will be able to talk you through the process and help you select the right combination of products for your stand.
